## Cover Your Bases, Get Immunized!

This list shows ages when shots are typically recommended.

|                    |  |
|--------------------|--|
| Birth              | Hepatitis B                                  |
| 2 months           | Hepatitis B DTaP, Hib, Polio, PCV, Rotavirus |
| 4 months           | DTaP, Hib, Polio, PCV, Rotavirus             |
| 6 months           | Hepatitis B, DTaP, Hib, Polio PCV, Rotavirus |
| 12 months          | MMR, DTaP, Hib, PCV, Varicella, Hepatitis A  |
| 6 months and older | Influenza (yearly)                           |

Children need shots to protect them from dangerous diseases. For more information, please call your child's health care provider, your local health department, or the Lancaster County Immunization Coalition (717) 544-3144.

# Anti-Vaccine Advocates

- The “myth” of associating vaccines to Autism still persists.
- More and more practices are reporting that parents request “separate” vaccinations for their children and alternative schedules.
- School Nurses are reporting an increase in philosophical exemptions.
- Anti-Vaccine proponents are often prepared to argue their position.

**We must be prepared to do the same!**

## More Anti-vaccine promotion...

# Anti-vaccine activists of the past

- As early as the 1890's, Anti-vaccine activists were resisting vaccination.

Some of the anti-vaccine groups included:

- The Brooklyn Compulsory Anti-Vaccination League
- The Massachusetts Compulsory Anti-Vaccination Association
- Anti-Vaccination League of America

All were initiated by disgruntled anti-vaccine individuals...
